On ESIP as an Org:

"ESIP isn't going to be great, ESIP is great!"

ESIP Accomplishments:

Peter Fox is a Tetherless World Constellation chair and professor of Earth and Environmental Science, Computer Science and Cognitive Science, and director of the Information Technology and Web Science Program at Rensselaer Polytechnic Institute (RPI). He is known for defining informatics and data science in earth sciences.

In 2007, Peter created the Semantic Web cluster and over the past eight years, brought experts together around Earth science semantic technology. As ESIP President for the past two years, Peter empowered the entire community to do great work and under his leadership ESIP thrived. In addition, he has raised the visibility of ESIP nationally and internationally at RDA, GEO, NOAA's DAARWG and other meetings. We are grateful for his leadership.
